Experience

Software Engineer – Midwestern Interactive   Joplin, MO
Full Time   *March 2022 – Present*

- **Developed** scalable, efficient and component-driven web applications with continuous integration and deployment capabilities using technologies such as Typescript, Next.js, Vue.js and Nest.js.
- **Collaborated** with clients, designers, fellow developers and project managers using Agile and SCRUM methodologies for software development, utilizing a variety of Kanban-style project management boards.
- **Optimized** legacy code implementation and cleaned up redundant and unnecessarily complex functions to increase performance.

Web Developer – Great Idea Development (self-owned)   Collinsville, MS
Owned/Operated   *February 2014 – Present*

- **Collaborated** with clients to best understand their business needs and formulate methods to minimize ship-time for projects.
- **Designed** responsive, eye-catching frontend websites and applications to improve user engagement and ease of use utilizing Next.js, Vue.js and CSS frameworks such as Tailwind CSS.
- **Engineered** robust backend solutions, including REST APIs build with Nest.JS and Prisma.

Senior Software Developer – Liquid Creative   Jackson, MS
Full Time   *September 2021 – March 2022*

- **Developed** CMS-driven applications for local businesses using Alpine.js, JavaScript, PHP, HTML and CSS based on OctoberCMS/WinterCMS platforms.
- **Collaborated** with designers to accurately represent client and designer vision using tools like Bootstrap and Tailwind CSS.
- **Implemented** development processes using Kanban boards and converted code repositories to GitHub for easy collaboration and version control.
- **Optimized** internal hosting solutions and implemented measures to secure, optimize and update servers.

Web Developer/Systems Engineer – InCare Technologies   Ridgeland, MS
Full Time   *November 2019 – September 2021*

- **Developed** web applications and websites for businesses across the southeast utilizing React.js and WordPress.
- **Managed** 75+ websites and provided maintenance to ensure each were up-do-date and secure.
- **Supported** 300+ businesses across the southeast with advanced IT and network support.

Senior Field Technician/Web Expert – Ideal Software   Meridian, MS
Full Time   *September 2013 – September 2017*

- **Supported** 100+ clients in the Family Entertainment industry with on-site installation and training
- **Deployed** internally developed ecommerce solutions for ticket and admission sales using HTML and CSS

Projects

- **Recipe Vault Online:** Online cookbook solution developed with Next.js and Tailwind CSS with custom-built backend API based on Nest.js, Prisma and Postgres. Features user authentication and authorization and ability to access favorited and shared recipes.
- **Great Idea Media Platform:** Online news/journalism solution that provides a custom-tailored CMS for writers and photojournalists. Developed with Next.js and Tailwind CSS, with a custom-built backend API based on Nest.js, Prisma and Postgres.
